PROFILE

Computer Science & Artificial Intelligence student at Université Hassan II (FSBM) and founder of H84 LAB, actively seeking an internship (stage) in Full-Stack Development, Software Engineering or AI/ML solutions. I build robust, responsive web applications with React and JavaScript, back them with Python and REST APIs on relational databases, and enjoy turning complex system logic into clean, intuitive digital experiences.

Fast learner, adaptable and detail-oriented, eager to contribute to an engineering team on real-world problems while growing through hands-on experience.

TECHNICAL SKILLS

Frontend: React, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Responsive Design

Backend & APIs: Python, Node.js, RESTful APIs, C/C++

Data: SQL, relational databases, relational algebra, Machine Learning concepts

Tools & Systems: Git/GitHub, Docker, Linux, Figma, Networking fundamentals

Strengths: Problem solving, fast learning, adaptability, attention to UI/UX detail

PROJECTS

Infinity Space Club Web App — React.js *Team academic project, FSBM*

- Developed a complete, functional React.js web application for the Infinity Space Club at FSBM, as part of a team academic project.
- Applied component-based development and responsive design to build a clean, reusable interface.
- Collaborated with teammates using Git/GitHub, strengthening teamwork and problem-solving; supervised by Prof. Mohamed Ghazouani.

Banking Management System — C *Academic project, Université Hassan II*

- Developed a secure, structured banking management system in C as a module project, managing client data, bank accounts and financial operations (withdrawals and transfers).
- **Data structures:** designed custom structures for Clients and Accounts.
- **Business logic:** enforced real-world banking rules, such as a 1000 DH minimum balance to open an account and a 700 DH limit per withdrawal.
- **Interactive UI:** built a multi-level menu architecture with functions, loops and conditions for smooth navigation.
- **Code quality:** managed sequential collection storage using arrays and dynamic tracking.

H84 LAB — Independent studio *Founder*

- Founded H84 LAB, a personal development and design brand; publish projects and a live portfolio at h84-lab.vercel.app.
- Maintain a professional GitHub profile with branded README and featured projects: **Concour Med, Marous Jewelry.**

EDUCATION

Licence d'Excellence, Artificial Intelligence — Faculté des Sciences Ben M'Sik, Casablanca *Oct 2026 – Present*

DEUG, Software Development — Faculté des Sciences Ben M'Sik, Casablanca *Sep 2024 – Jul 2026*

Baccalauréat, Sciences Mathématiques — Lycée Qualifiant Biranzarane *2024*

- Focus: software development, programming (C/C++, Python), databases and artificial intelligence.
